

SUN VALLEY WATER & SEWER DISTRICT

Dear Sun Valley Homeowner,

THE FACTS:

- The current water scenario is dismal, with no relief in sight.
- We are in the third year of below average snowpack.
- We have a precipitation deficit of 10” over the last two years,
- The area rivers have already reached peak flows and are declining. The area rivers generally reach peak flows in early June.
- Magic Reservoir will not fill this year.
- Senior priority water right holders have caused an administrative action resulting of curtailment of junior priority water right in the Wood River Valley.

WHAT’S NEXT:

- Reduce irrigation use now by at least 25%
- Minimize new plantings, which require additional water
- Irrigation curtailment is a very real possibility, if conditions dictate, water would be reserved for domestic use and fire protection
