

Sun Valley Water and Sewer District & Winterizing Your Residence

Its our annual SVWSD reminder - please take steps to prevent plumbing from freezing up.

NOW is the time to establish steps to protect your home and mitigate pipes freezing.

Ice in waterlines results from a few common items, many of which can be addressed:

- Lack of Snow Cover results in deeper frost penetration
- Lack of Water Flow & movement
- Shallow Waterline Depth (*esp. accurate on Bitterroot Rd with bedrock level*)
- Disturbed Groundcover from recent construction
- Heating System Failure

SVWSD Service Rate Changes Effective December 1, 2024

Base Connection	IN District	OUT of District
Water	20.92 / mo.	31.88 / mo.
Sewer	36.96 / mo.	55.44 / mo.

- › 7% increase
- › Costs – drought, operating
- › Capital expense

Irrigation (Sprinkling): 2025	IN District	OUT of District
Tier 1 (zero - 25,000 gall/mo)	1.65 / 1,000 gallons	2.47 / 1,000 gallons
Tier 2 (25,001 - 50,000 gall/mo)	1.92 / 1,000 gallons	2.87 / 1,000 gallons
Tier 3 (50,001 - 75,000 gall/mo)	2.24 / 1,000 gallons	3.35 / 1,000 gallons
Tier 4 (75,001 - 100,000 gall/mo)	2.77 / 1,000 gallons	4.16 / 1,000 gallons
Tier 5 (over 100,001 gall/mo)	3.84 / 1,000 gallons	5.76 / 1,000 gallons
